

Travis Foundation Privacy Statement

Our goal is to bridge language barriers where it's needed the most. The Foundation is built on a community which consists of gracious people who are willing to go out of their own way to help people who got dealt a bad hand. In order to grow our community, it's important to stay in touch.

In the process of bridging barriers and expanding our range, chances are that your personal information is processed. In that regard, privacy is our top priority. In our opinion, the importance of retaining your privacy can't be overstated. To that end, we promise:

- To be transparent and fair about how we're collecting information;
- To only collect and store information about you for specific purposes and retain that information no longer than necessary;
- To take security measures to protect your information from unauthorized access;
- And to provide you means to check, update, obtain, and remove your information with us.

Consent

We'll ask you when we need information that personally identifies you (personal information) or allows us to contact you. Generally, this information is requested when you arrive on the site through one of our campaigns or sign up for email newsletters. This is done through forms that you can fill in, and invisibly by setting 'cookies' and loading 'tracking pixels' that determine if you've interacted with us before.

Purpose

The purpose of the collection of data is to recognize you as a friend on social media or for our newsletter. It also helps us to create content most relevant to you by understanding what you're interested in.

We won't keep your personal data longer than necessary for the previously mentioned purposes.

Access

You will be able to opt-out of the email service that is provided by unsubscribing to from the service. You have the right to access, change or remove the personal data from our database.

For inquiries related hereto: hello@travis.foundation.

Data Breach Procedure

In the event that, despite our best efforts, a data breach occurs, we shall evaluate the scope of such a breach immediately and, if required to, promptly report such a breach with relevant authorities. We'll also notify everyone affected by the breach and provide information on how to minimize the impact.

Cookies

Cookies are small text files placed on your computer, tablet, or mobile phone when you use our website(s). Cookies are not capable of harming your device, but necessary to provide you with a smooth functioning experience. We use three types of cookies, namely functional cookies, analytical cookies, and tracking cookies. However, we will only use the tracking cookies with your consent.

Functional cookies

Functional cookies are cookies that are essential for the functioning of the Service. Without these cookies, the website(s) would be unable to function properly. This means that these cookies cannot be turned off. There is a difference between session functional cookies and permanent functional cookies. The session cookies are deleted after you have left the website(s). The permanent cookies are saved to prevent you from having to perform the same actions over and over again. An example of the use of permanent cookies are purchases which you have saved in your cart on a shopping website. We do not share the information obtained with these cookies with third parties.

Analytical cookies

Analytical cookies are cookies which are needed for the continued good functioning of the website(s). We use them to understand what people visit us, how long it takes before a page has been loaded and what buttons are pressed by people visiting the website(s). Some analytical cookies may be placed without your consent, because they anonymize any information collected about you.

Tracking/social and remarketing cookies

Tracking pixels are tiny pieces of code from third-parties that check and/or put cookies that allows us to adapt our website(s) and other communications' content to your interests and preferences, or to advertise on third-party websites and social media after you have visited our website(s). Additionally, tracking pixels allow us to understand which advertisements are of interest to you, so that you will only see relevant content, and whether we've been in contact before on other platforms such as social media or our newsletters.

Some of these tracking codes are from social media platforms such as Facebook and LinkedIn. We cannot influence exactly how they put cookies, but we encourage you to read the respective social network's privacy policy to see how these companies treat your (personal) data, and please beware that these policies are open to change. The information which is obtained by these social networks is anonymized as much as possible. Companies like LinkedIn, Twitter, Facebook, and Google comply with the Privacy Shield Principles and are a member of the Privacy Shield-program from the American Ministry of Commerce. This means that there is an appropriate level of protection as described in the GDPR.
